## SUMMARY

---

Transitioning from a role as a radiology technician to a full-stack web developer. I thrive in an entrepreneurial and highly operational environment. I am organized, calm, and adaptable. Embracing a growth mindset, I constantly strive to improve my skills on a daily basis.

## TECHNICAL SKILLS

---

**Languages:** HTML/CSS, JavaScript, TypeScript, Python

**Frameworks/Libraries:** React, Next.js, Node.js, Express.js, Nest.js, Flask, WordPress, TailwindCSS, Jest

**Tools:** Git, VS Code, PyCharm, Postman, Figma, NPM, PostgreSQL

## EXPERIENCE

---

### Full-Stack Developer

Dec. 2023 – Present

*OpenBC - Open Source Organization*

*Vancouver, BC*

- \* Implemented unit tests with Jest, contributing to the development of reusable software solutions
- \* Collaborated with developers and designers to deliver production-ready code, adhering to industry standards
- \* Created project documentation to ensure clarity, consistency, and effective communication across cross-functional teams

### Developer Mentor

Sep. 2023 – Present

*SkillUp Mentor*

*Remote*

- \* Mentored aspiring developers in learning HTML, CSS, and JavaScript through hands-on guidance
- \* Conducted regular code reviews to enhance coding skills and efficiency
- \* Engaged in weekly meetings, collaborating with senior developers to discuss challenges and foster a dynamic learning environment

### WordPress Developer

Oct. 2023 – Dec. 2023

*Freelance*

*Remote*

- \* Crafted visually appealing WordPress websites, integrating customized plugins and tailored CSS
- \* Implemented responsive web design strategies to optimize functionality across various devices
- \* Collaborated with clients, ensuring effective communication to understand and meet their specific needs

## PROJECTS

---

### AuctionBay | *TypeScript, React, Next.js, Nest.js, Node.js, PostgreSQL, TailwindCSS*

Oct. 2023 – Dec. 2023

- \* Developed a Full-Stack app with CRUD functionality, enabling users to create and manage auction events and bid on active auctions
- \* Implemented Swagger API documentation to enhance project clarity and streamline frontend development processes
- \* Utilized Figma to replicate a pixel-perfect design, ensuring a simple and intuitive user interface to enhance the overall user experience
- \* Conducted testing of API endpoints using Postman to ensure seamless communication and robust functionality

### Resumivise | *TypeScript, React, Next.js, Python, TailwindCSS*

May 2018 – May 2020

- \* Implemented OpenAI API for personalized resume customization based on user-provided job descriptions, ensuring alignment with job requirements
- \* Collaborated with a fellow developer, employing Git for version control
- \* Utilized TypeScript, React, and Tailwind CSS to craft user-friendly UI, enhancing the overall user experience

## EDUCATION

---

### University of Ljubljana Faculty of Health Sciences

*Bachelor of Radiologic Technology*

Ljubljana, SI

*Oct. 2019 – Aug. 2022*
